

# ECSEL-Austria

ECSEL-Italy Day, 26 January, 2022, online

Francesca Flamigni, TTTECH

**ECSEL**  
Austria

**ECSEL**  
Austria

**ECSEL-Austria** is an industry-driven national research, development and innovation platform representing the technology areas of micro and nanoelectronics, embedded systems and systems integration.

- **Founded 2013** based on ARTEMIS-Austria (embedded software and software architecture) and ENIAC-Austria (micro- and nanoelectronics)
- Legal Status: **Verein**
- currently **44 Members**

**ECSEL**  
Austria

## **Our mission:**

Secure supply of key technologies and critical knowhow in the field of electronic components and systems to support innovation in all major sectors of the economy and society in Europe.

## **Our vision:**

European leadership  
in electronic based  
systems

## Electronic Based Systems (EBS) in Austria

100+  
R&D organisations

4000+  
Researchers

70000+  
people employed  
in EBS-relevant  
companies

**ECSEL**  
Austria

## Partners & members

The network of ECSEL Austria consists of Austrian Stakeholders, Austrian Clusters and Silicon Alps, the BMVIT RDI Framework and „Silicon Austria“ Program and the European RDI Framework.

# Activities ECSEL-Austria 2022 (planned)

## Events

- May ECSEL-Austria spring conference & General Assembly (hybrid)
- Oct Fall event ECSEL-Austria (hybrid)

## Network/Strategy

- Cooperation & coordination Silicon Austria Labs (SAL) 
- Quantum Communication Infrastructure (QCI)
- Workshops: SRIA, ebs strategy, etc.
- Implementation of new target group-oriented communication strategy
- Interaction with other platforms
- Close cooperation with public authorities on national level (BMK – federal ministry of climate action)

## (External) visibility

- June IMAGINE22, Vienna, target group researchers and students
- EBS-Study „ECSEL-funded projects and their impact: Case studies of Austrian companies” – Publication via (web/print) brochure; web-story
- ECSEL-Austria „(EBS) FH Preis 2022” (award for EBS-related project, university of applied studies)
- Call & awarding of 3 ebs-related Bachelor/Master Thesis with ebs focus

# IPCEI on Microelectronics - The Austrian Contribution

## Strengthening IPCEI ME with the Innovation Capacity of Austrian Technology and Market Leaders

- The Austrian IPCEI participation underpins the proactive engagement of Austria in the development of the European **EBS** innovation eco-system, and the technology and market leadership ambitions of the three involved companies.
- The Austrian partners are adding significant complementary competencies to the existing consortium in the area of **energy efficient** and **secure ICs** and **advanced electronic power** solutions.

## Scope & Focus (of IPCEI contribution)

### AT&S:

First Industrial Deployment (FID) of **advanced packaging technology** for European Electronic Based Systems

### INFINEON:

Technology Development (R&D&I) and First Industrial Deployment (FID) of **leading edge power semiconductors** supporting Green Deal Targets

### NXP:

**Hardware-based security** for energy efficient and trustworthy EBS solutions

Dissemination  
& Spillover

R&D&I

FID

Mass Production

Cooperation

IPCEI as enabler for fast market implementation of innovation „Made in Europe“.

# Spill-over Activities by Austrian Partners – Benefits for European Industry & Society

## Education/ training

Sponsored professorships,  
lectures and training activities with universities,  
hackathons,  
SME trainings,  
customer trainings

1

2

## Conferences & workshops

Conference contributions ideally in concert with  
IPCEI direct or indirect partners, within the  
microelectronics sector & beyond  
(e.g. health, energy sector)  
to ensure knowledge transfer

## Papers & publications

Scientific & non-scientific (non papers, white  
papers) contributions, with partners (e.g. with  
universities or common standardization events)

3

4

## Media activities

(IPCEI) Website activities,  
Social Media,  
Linked-In Campaign,  
Press Releases

## Actions with industry associations/ clusters

E.g. Silicon Alps (Silicon Europe Alliance),  
application clusters like AC Styria

5

ECSEL  
Austria

## THE | AUTONOMOUS

The global  
community shaping  
the future of safe  
autonomous mobility

## THE AUTONOMOUS

### The Purpose:

#### TACKLING THE BIGGEST SAFETY CHALLENGES

The Autonomous brings together the world's major mobility stakeholders to shape the future of safe autonomous vehicles.

- is an open platform initiated by TTTech Auto
- is a global community shaping the future of safe autonomous mobility
- aims at building an ecosystem of all actors involved in the development of safe autonomous mobility
- will develop Global Reference Solutions facilitate the adoption of safe autonomous mobility on a grand scale  
(Complementary to standardization organizations)

### Ricky Hudi – Chairman:

Joining forces will help to develop safe technology, share the substantial costs and lay the basis for sustainable customer trust and unified standards.

The Autonomous Community
THE AUTONOMOUS

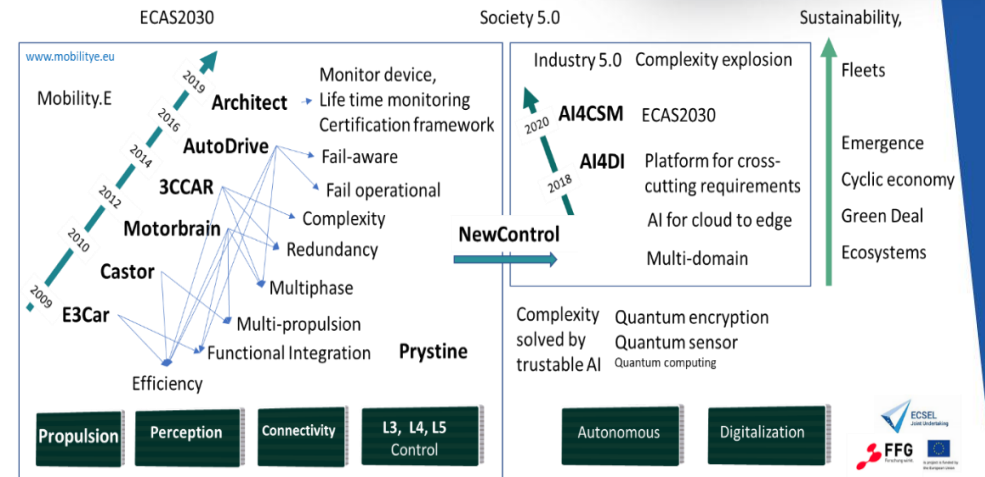

# Safety, Research & Innovation workshop @ THE AUTONOMOUS

## The ecosystem

ECO Design, Efficiency, Material substitution, reduce yield losses | Carbon dept visibility, environment impact bill, supply chain resources, | components and data for cyclic economy

- Focusing on the next biggest challenges of autonomous and sustainable mobility
- Presenting funding opportunities in ongoing and future programmes such as KDT JU, SNS JU, CCAM, Horizon Europe, (i.e. PRYSTINE, NewControl, Up2DATE) ...
- Taking assets of the results of completed or ongoing projects
- Discussing how to support the innovation, e.g. new partnerships, funding schemes, strategic agenda,...

For more information:

Driving, connected assets, digital twin | MOBILITY-E LIGHTHOUSE

Integrated, Fail-Operational, Cognitive Perception, Planning and Control Systems for Highly Automated Vehicles

- Increase the accuracy and robustness of algorithms, E/E architectures for adaptive perception
- Increase performance, power, reliability, and reduce cost of the on-board computing platforms used for perception, cognition and control
- Achieve certifiability of adaptive algorithms for safety-critical control functions
- Develop a generalized hardware abstraction layer for efficient, adaptive fail-operational control of propulsion systems across vehicular platforms
- Competitive edge to European industry
- Increase user acceptance of automated control functions

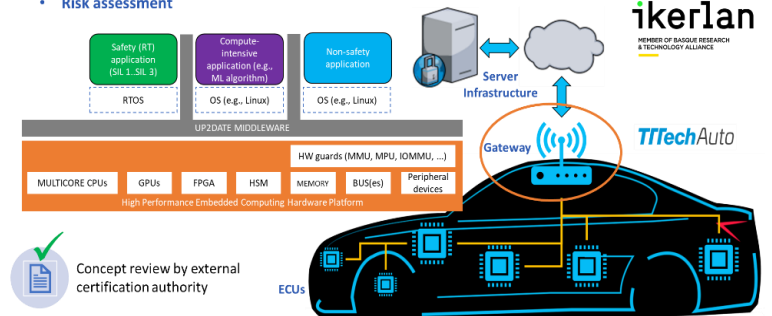

Holistic virtualized platforms enabling mobility as a service

Safety and security

- Safe and secure update management procedure
- Safe and secure requirements and mixed-criticality architecture design
- Risk assessment

# The Initiative

# THE AUTONOMOUS

The Autonomous Main Event (in-person and virtually simultaneously)

• SAVE the DATE – September 27, 2022, Vienna, Austria

- ✓ Hybrid **keynotes and panel discussions** (virtual & in-person)
- ✓ Unique **networking opportunities** with leading executives and experts from the industry
- ✓ **On-site workshops + virtual roundtables**

Registration will open soon!

THE **AUTONOMOUS** **WORKING GROUP** Safety & AI  
**\*\*New Working Group on Safety & Artificial Intelligence\*\***

- ✓ Stay tuned for the kick-off of The Autonomous second Working Group on Artificial Intelligence in 2022!

## Event Stream

THE **AUTONOMOUS** Working Group Safety & Architecture

## Innovation Stream

First international Working Group on Safety & Architecture

- ✓ Major technology and automotive companies are now working on a **safe system architecture** for self-driving vehicles.
